RECORD BREAKING ENGINEERING

Pumping solutions for Industry and Environment

Worldwide reliability

Since 1973, SCHWING has been developing reliable and efficient pumping solutions in various industrial sectors. Whether in waste water treatment plants in Germany, in tunnel boring machines in China, in diamond mines in Canada or on supply vessels for drilling platforms: the pump systems from SCHWING have been supporting the smooth and efficient operation of numerous industrial and municipal plants worldwide for decades thanks to their excellent reliability and easy maintenance.

Waste recycling

- Waste sludge
- Oil sludge
- Salt sludge
- radioactive waste

Mining | Refineries |

Power stations

- Red mud
- Gold sludge
- Iron sludge
- Zinc sludge
- Metal oxide sludge
- Tailings
- Fly ash
- ...

Feed industry

- Animal feed
- Fishmeal
- Abattoir by-products
- Animal waste

Construction industry

- Bentonite
- Wet loam
- Backfilling grout in tunnel construction
- Tunnel muck
- Contaminated soil
- ...

Sewage sludge

- Mechanically dewatered with and without foreign bodies
- Systems for sewage sludge incineration in cement works

Dredging of bodies of water

- Dredged material
- Water sludge
- Silt

Chemistry and industry

- Organic and inorganic substances
- Stabilised chemical waste
- Liquid lime sludge
- By-products of food production
- Paint sludge
- Pulp
- Carbonatation sludge

Sewage sludge

Fly ash

Tailings

Backfill material

Output max. 230 m³/h
Output pressure max. 150 bar
Solids content max. 80 %
 (depending on pumping material)

Pumping of dewatered sewage sludge in a waste water treatment plant
Germany

Pumping of fly ash in a power plant
Croatia

Pumping of mining residues in a diamond mine
Canada

Pumping of dewatered sewage sludge in a waste water treatment plant
China

Pumping of dewatered sewage sludge in a waste water treatment plant
Germany

Pumping of dewatered sewage sludge in a cement plant
Germany

SCHWING Industrial pumping systems.
The benchmark for reliability.
